

Practitioner Orders for Life-Sustaining Treatment

**Hospice Setting** 

# Permission to Use

- This slide presentation may be used without permission.
   To promote consistency across the state, the slides may not be altered.
- You may freely take language (but not screenshots) from this presentation to use in your own presentations.
- Please send requests for institutionally specific modifications to polstIllinois@gmail.com.

# DISCLAIMER

- Note that this presentation provides clinical guidance for the POLST Paradigm and should NOT be construed as medical nor legal advice.
- For answers to legal questions, check with your own legal counsel.

# **Objectives**

### By the end of this session, participants will be able to:

- Understand the POLST Model and when it is an appropriate part of advanced care planning
- Describe the relationship between Advance Directives and POLST forms, and when each is appropriate for completion
- Describe the elements of a quality POLST conversation
- Understand the sections of the POLST form.
- Recognize the importance of care providers being properly educated regarding POLST Model policy and practice

# **POLST Program Overview**

### What is POLST?

- In Illinois POLST stands for <u>Practitioner</u>\* Orders for Life Sustaining Treatment
- It is NOT just a form, it is a process
  - Approach to end-of-life planning based on thoughtful conversations with the person, a friend or family if desired, and healthcare professionals
  - Incorporates values, beliefs and priorities as these relate to prognosis, likely disease course & treatment choices

<sup>\*</sup> Physician, Advanced Practice Registered Nurse, Physician Assistant, Resident in 2<sup>nd</sup> year or higher of residency program

# Where did POLST come from?

National POLST Program Designations As of February 2020

# Why does the POLST Form exist?

# First responders need clear guidance for how to respond to a medical emergency in the field

- Recognized IDPH standardized form for the entire state of Illinois
- Concrete <u>medical orders</u> that must be followed by healthcare providers and first responders, so that treatment is in keeping with the person's wishes
- Evolved from the original IDPH DNR form (prior versions of forms are valid)

Practitioner Orders for Life-Sustaining Treatment

# Why would a person need a POLST form?

- Helps ensure appropriate care and treatment if a person experiences an acute deterioration of their health
- Helps share goals-of-care preferences and instructions amongst family caregivers or when transferring sites of care (e.g., nursing home, paramedics, hospital, home)
- Allows loved ones to contact 911 in a critical medical emergency without fear of patient receiving unwanted treatment if death is imminent

## Who should have a POLST Form?

The POLST decision-making process and resulting medical orders are intended for people of any age who are at risk for a life-threatening clinical event because they have a serious life-limiting medical condition, which may include advanced frailty.

### This includes but is not limited to people with:

- Severe Heart Disease
- Metastatic Cancer or Malignant Brain Tumor
- Advanced Lung, Renal or Liver Disease
- Advanced Frailty
- Advanced Neurodegenerative Disease
   (e.g., Dementia, Parkinson's Disease, ALS)

## What else to know about a POLST?

- The POLST form speaks for patients ONLY when they can't speak for themselves.
- The patient can void or change their POLST form at anytime as their disease and health changes.
- A patient without POLST orders receives FULL TREATMENT as the default, and this may be a reason not to complete the form.
- Accompanies patient from care setting to care setting

# How is a POLST Form different from a Power of Attorney for Health Care?

|   | POWER of ATTORNEY for HEALTH CARE | POLST Form                                 |
|---|-----------------------------------|--|
| Who needs                                   | All Decisional Adults             | Serious Life-limiting Medical<br>Condition |
| Who completes                               | Individual                        | Health Care Practitioner                   |
| Appoints a substitute decision maker        | Yes                               | No   |
| Real-time instructions for first responders | No                                | Yes  |

### What are the benefits of POLST?

#### **Promotes Person-Centered Care**

- Allows the person, loved ones and providers to discuss and document the person's values and preferences for treatment in a medical emergency
- Protects individuals who live in the community from treatment that is inconsistent with their preferences
- Reduces medical errors by improving guidance during lifethreatening emergencies

# IDPH Uniform POLST: I. The Conversation

# Introducing the POLST Conversation

#### WHO:

- Physician
- APRN
- PA
- RN
- Social Worker
- Chaplain
- Qualified healthcare practitioner reviews orders & signs form

### WHAT TO DO:

- ✓ Use simple language
- ✓ Start with a DISCUSSION, then end with the POLST form itself
- ✓ Explain under what circumstances the form might be useful
- ✓ Ensure that the individual has necessary information to make each decision
- ✓ Inform that POLST form is optional and can be changed at any time

Practitioner Orders for Life-Sustaining Treatment

### **POLST Conversation – BEFORE the Form**

- Review relevant medical facts; uncovering gaps in person's understanding of prognosis
- Explore experiences; identifying fears and concerns
  - Awareness of the purpose and benefits of hospice care
  - Awareness of potential complications resulting from illness
  - Awareness of potential emergency treatments of these complications (e.g., CPR, intubation, hospitalization in ICU)
- Ask patient to reflect on goals/values and how they influence preferences
- And then, put the preferences in writing to translate them into actionable medical order

Practitioner Orders for Life-Sustaining Treatment

# **Demonstrating That You Care**

- Always approach with compassion
- Ask for permission to proceed with difficult discussions
- Encourage understanding between patients and family members
  - Hearing the information for the first time is hard.
  - It's normal to need time to think things through.
  - Use multiple conversations as needed.

- . Use of original form is encouraged. Photocopies and faxes on any color of paper also are legal and valid forms.

#### Reviewing a POLST Form

This POLST form should be reviewed periodically and in light of the patient's ongoing needs and desires. These include:

- · transfers from one care setting or care level to another:
- . changes in the patient's health status or use of implantable devices (e.g. ICDs/cerebral stimulators);
- . the patient's ongoing treatment and preferences; and
- · a change in the patient's primary care professional.

#### Voiding or revoking a POLST Form

- . A patient with capacity can void or revoke the form, and/or request alternative treatment.
- Changing, modifying or revising a POLST form requires completion of a new POLST form.
- Draw line through sections A through E and write "VOID" across page if any POLST form is replaced or becomes invalid. Beneath the written "VOID" write in the date of change and re-sign.
- · If included in an electronic medical record, follow all voiding procedures of facility.

#### Illinois Health Care Surrogate Act (755 ILCS 40/25) Priority Order

- 1. Patient's guardian of person
- 2. Patient's spouse or partner of a registered civil union

- 6. Adult grandchild
- 3. Adult child
- 7. A close friend of the patient

4 Parent

8. The patient's guardian of the estate

HIPAA (HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT of 1996) PERMITS DISCLOSURE TO HEALTH CARE PROFESSIONALS AS NECESSARY FOR TREATMENT

SEND A COPY OF FORM WITH PATIENT WHENEVER TRANSFERRED OR DISCHARGED . COPY ON ANY COLOR OF PAPER IS ACCEPTABLE . 2017 ■ SEND A COPY OF FORM WITH PATIENT WHENEVER TRANSFERRED OR DISCHARGED • COPY ON ANY COLOR OF PAPER IS ACCEPTABLE • 2017 ■

# 3 Primary Medical Order Sections

### A. If NO pulse and NO breathing: CPR wishes

- Attempt resuscitation
- Do Not Attempt resuscitation (DNR)

# B. If pulse and/or breathing are present: Care wishes

- Full Treatment
- Selective Treatment
- Comfort-Focused Treatment

## C. Medically Administered Nutrition

- Acceptable
- Trial Period
- None

CARDIOPULMONARY RESUSCITATION (CPR) If patient has no pulse and is not breathing.

☐ Attempt Resuscitation/CPR

□ Do Not Attempt Resuscitation/DNR

(Selecting CPR means Full Treatment in Section B is selected)

When not in cardiopulmonary arrest, follow orders B and C.

Section A documents what a person wishes to occur if they are found with no pulse and not breathing.

The presence of a POLST form <u>DOES NOT</u> mean DNR. Patients can use a POLST Form to indicate "Attempt Resuscitation" as well as "Do Not Attempt Resuscitation".

If "Attempt Resuscitation/CPR" box checked: Start CPR and full cardiac arrest care per local protocol.

If "DNR" box checked: Do NOT begin CPR.

# **Acceptable Options for a Valid Form**

# Section "B": Medical Interventions

Check One (optional)

#### MEDICAL INTERVENTIONS If patient is found with a pulse and/or is breathing.

□ Full Treatment: Primary goal of sustaining life by medically indicated means. In addition to treatment described in Selective Treatment and Comfort-Focused Treatment, use intubation, mechanical ventilation and cardioversion as indicated. Transfer to hospital and/or intensive care unit if indicated.

DPH POLST

**IDPH POLST** 

- □ Selective Treatment: Primary goal of treating medical conditions with selected medical measures. In addition to treatment described in Comfort-Focused Treatment, use medical treatment, IV fluids and IV medications (may include antibiotics and vasopressors), as medically appropriate and consistent with patient preference. Do Not Intubate. May consider less invasive airway support (e.g. CPAP, BiPAP). Transfer to hospital, if indicated. Generally avoid the intensive care unit.
- Comfort-Focused Treatment: Primary goal of maximizing comfort. Relieve pain and suffering through the use of medication by any route as needed; use oxygen, suctioning and manual treatment of airway obstruction. Do not use treatments listed in Full and Selective Treatment unless consistent with comfort goal. Request transfer to hospital only if comfort needs cannot be met in current location.

**Optional Additional Orders** 

Section B documents what a person wishes to occur if they are found with a pulse and/or breathing present but unable to communicate; cardiac arrest may occur shortly.

The checked box explains patient's goal for treatment and specifies which treatments the patient wants to have and avoid.

✓ Full Treatment: Transfer me to the hospital and provide all appropriate treatment. I want to live as long as possible.

Must be selected when selecting CPR in section A

Either box may be marked in Section A

DPH POLST

IDPH POLST

## Section "B": Medical Interventions

✓ Selective Treatment: Transfer me to the hospital for medical treatment, but I do not want to be on the ventilator.

Person could receive treatments such as:

- IV fluids; IV meds as appropriate
- May use CPAP, BiPAP, BVM
- Other treatments as needed to return to "baseline"

# Section "B": Medical Interventions

✓ **Comfort-Focused Treatment**: I want to be as comfortable as possible where I am but transfer me to the hospital if my pain or symptoms cannot be alleviated.

# Section "B": Comfort Focused Treatment

"Comfort-focused treatment" requires a clear explanation to the patient/substitute decision-maker:

- Regardless of the option selected in section B, treatment for comfort is always provided – we never do nothing!
- For example, if a person is choking, suction, manual treatment of airway, Heimlich maneuver would be implemented:

Choking is NOT COMFORTABLE!!

### Another way to think about Sections A & B

# Section "B": Medical Interventions

Optional Additional Orders - used to customize form for individual medical conditions when necessary

Although it isn't critical for emergency care, it is very helpful for healthcare providers to know your wishes about feeding tubes, called medically administered nutrition.

- ✓ Yes, I do want long-term artificial nutrition if I am no longer able to take foods or liquids by mouth
- ✓ Trial period, I do want artificial nutrition for a trial period (see additional instructions)
- ✓ No, I do not want long-term artificial nutrition if I am no longer able to take foods or liquids by mouth

### Section D: Documentation of Discussion

|   | D | DOCUMENTATION OF DISC   | USSION (Check all appropria | ite boxes below) |      |        |
|---|---|---|-----------------------------|------------------|------|--------|
| ST  | U | ☐ Patient ☐ Agent under health care power of attorney ☐ Parent of minor ☐ Health care surrogate decision maker (See Page 2 for priority list) |                             |                  |      | БЬ     |
| POLST   |   | Signature of Patient or Lega  | al Representative           |                  |      | Ī      |
| IDPH  |   | Signature (required)  |                             | Name (print)     | Date | OLST   |
| Signature of Witness to Consent (Witness required for a valid form)  I am 18 years of age or older and acknowledge the above person has had an opportunity to read this form and have witness giving of consent by the above person or the above person has acknowledged his/her signature or mark on this form in my |   |   |                             |                  |      | ■ IDP  |
| ры Росят  |   | Signature (required)  |                             | Name (print)     | Date | H POLS |

#### **Need 2 signatures here**

- Patient, agent (POAHC), or healthcare surrogate
- Witness to consent

If consented by patient's legal representative, supporting documents verifying agent powers are NOT needed by EMS

# Section E: Signature of Practitioner

| º i  | Signature of Authorized Practitioner (physician, licensed resident (second year or higher), advanced practice nurse or physician as |  |  |       |  |  |
|--|---|--|--|-------|--|--|
|  | _   | My signature below indicates to the best of my knowledge and belief that these orders are consistent with the patient's medical condition and preferences. |  |       |  |  |
| _  |   | Print Authorized Practitioner Name (required)  | Phone  |       |  |  |
| STO  |   |  | ( )  | 뫄     |  |  |
| IDPH POLST   |   | Authorized Practitioner Signature (required)   | Date (required)                                | POLST |  |  |
| Form Revision Date - April 2016 (Prior form versions are |   | (Prior form versions are also valid.)  |  |       |  |  |
|  | SEND A  | A COPY OF FORM WITH PATIENT WHENEVER TRANSFERRED OR DISCHARGED . CO  | OPY ON ANY COLOR OF PAPER IS ACCEPTABLE • 2016 |       |  |  |

Must have practitioner's name, signature, and effective date to be valid. Verbal orders are allowable.

Practitioner's signature may be written by a nurse who adds her/his own initials - acceptable and form is valid

# Back Page – EMS does not take action

#### Completing the IDPH POLST Form

- . The completion of a POLST form is always voluntary, cannot be mandated and may be changed at any time.
- A POLST should reflect current preferences of persons completing the POLST Form; encourage completion of a POAHC.
- Verbal/phone orders are acceptable with follow-up signature by authorized practitioner in accordance with facility/community policy.
- · Use of original form is encouraged. Photocopies and faxes on any color of paper also are legal and valid forms.

#### Reviewing a POLST Form

This POLST form should be reviewed periodically and in light of the patient's ongoing needs and desires. These include:

- · transfers from one care setting or care level to another;
- changes in the patient's health status or use of implantable devices (e.g. ICDs/cerebral stimulators);
- · the patient's ongoing treatment and preferences; and
- · a change in the patient's primary care professional.

#### Voiding or revoking a POLST Form

- · A patient with capacity can void or revoke the form, and/or request alternative treatment.
- . Changing, modifying or revising a POLST form requires completion of a new POLST form.
- . Draw line through sections A through E and write "VOID" across page if any POLST form is replaced or becomes invalid. Beneath the written "VOID" write in the date of change and re-sign.
- · If included in an electronic medical record, follow all voiding procedures of facility.

#### Illinois Health Care Surrogate Act (755 ILCS 40/25) Priority Order

1. Patient's guardian of person

- 2. Patient's spouse or partner of a registered civil union
- 6. Adult grandchild

7. A close friend of the patient

3. Adult child 4 Parent

8. The patient's guardian of the estate

For more information, visit the IDPH Statement of Illinois law at http://dph.illinois.gov/topics-services/health-care-regulation/nursing-homes/advance-directives

HIPAA (HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT of 1996) PERMITS DISCLOSURE TO HEALTH CARE PROFESSIONALS AS NECESSARY FOR TREATMENT

mich 100 17-564

- Completing the back page of the POLST form is optional
- Form is valid if only first page.
- Information is helpful in identifying next of kin/emergency contact information.

# **Applying the POLST Program**

### **Review and Revision of POLST**

- POLST forms should be reviewed and updated periodically when the patient:
  - is transferred between ICU and general medical unit;
  - has a substantial change in clinical condition;
  - changes treatment preferences or goals of care
- The POLST conversation should be repeated before documenting new treatment decisions or confirming current treatment decisions

# Organizational Quality Practices for POLST

- Consistent, written policies related to use of POLST
- Training tailored to audience role in POLST Model
- POLST forms stored in a consistent place in the medical record that is easy to access
- Periodic audit of forms for validity and appropriate use

## NOT Recommended for Organizational POLST Policies

- 1. Mandating completion of POLST forms
- 2. Providing incentives for POLST form completion
- 3. Completing a form without meaningful conversation first
- 4. Giving a person a POLST form to complete for themselves
- Completing POLST form without patient/substitute decision-maker knowledge
- 6. Signing POLST form for patient/substitute decision-maker
- 7. Never reviewing completed POLST forms
- 8. Organizational failure to evaluate use of POLST

## POLST – Statutory Issues & IDPH Guidance

Disclaimer: this presentation cannot provide legal advice; it is intended for informational purposes only.

## When a patient cannot consent to POLST

- Falls to person legally authorized to act on that person's behalf:
  - legal guardian
  - agent under a power of attorney for health care
  - a surrogate decision maker
  - parent or legal guardian typically for a minor
- Surrogate decision maker priority IL Health Care Surrogate Act (755 ILCS 40/25)
  - 1. Patient's guardian of person
  - 2. Patient's spouse or partner of a registered civil union
  - Adult child
  - 4. Parent
  - 5. Adult sibling
  - 6. Adult grandchild
  - 7. Close friend
  - 8. Guardian of the estate

## Surrogate Consent to POLST w/No LST

Special requirements for a surrogate appointed under the IL Health Care Surrogate Act to consent to POLST when withholding or withdrawing "life-sustaining treatment" (LST)

- DNR in Section A (unclear if this counts)
- Selective Treatment or Comfort Focused Treatment in Section B
- No Medically Administered Nutrition in Section C
- 2 physicians examine and certify patient is non-decisional
- 2 physicians examine and certify patient has a qualifying condition
- 1 adult witness signature

## Surrogate vs. POAHC Consent to POLST

Practitioner Orders for Life-Sustaining Treatment

## Voiding or Changing a POLST

Patient who <u>regains</u> decisional capacity:

POLST is no longer consulted.

Patient should revisit POLST conversation and potentially revise form.

Power of Attorney for Health Care (always) & Surrogate (if no existing POLST):

Can void and/or complete a new POLST for nondecisional patient as conditions change

Substituted judgement if wishes are known/documented in AD

Best interest of patient if wishes are not known/documented in AD Health Care Surrogate if existing POLST consented to by patient themselves:

Must consult with attending practitioner

Encourage "substituted judgment standard" document in patient's POLST

Document new information known about <u>patient's</u> wishes in EHR

## Valid POLST Forms

- ✓ Properly executed prior versions of the IDPH Uniform DNR or the DNR/POLST Advance Directive are still valid. Most recently dated is followed.
- ✓ Photocopies of forms are valid.
- ✓ Picture of POLST form on electronic device is valid.

## Requirements for a Valid POLST Form

#### REQUIRED

Patient Identifying Information

#### Section A

#### 3 Signatures:

- 1) Patient or legal substitute decision-maker
- 2) Witness
- 3) Practitioner

Date of Practitioner Signature

#### **OPTIONAL**

All other information optional

All indicated treatment used where a decision is unspecified

Pink paper recommended to enhance visibility, but color does not affect validity of form

Practitioner Orders for Life-Sustaining Treatment

### **Evolution of the IDPH Uniform POLST Form**

## **National Support for POLST:**

Landmark Study JAGS 2014

- Study on the relationship between what POLST orders are selected and where people ultimately die. 18,000 death records (2010-2011) reviewed from Oregon's electronic POLST registry
- Relationship between options selected on the POLST form and <u>where</u> people die:
  - 6.4% of persons who had a POLST Form specifying Comfort Measures Only treatment wishes died in a hospital
  - 22.4% for persons who wished for Limited Additional Interventions died in a hospital
  - 44.2% of persons whose POLST specified wishes for Full Treatment died in a hospital
  - 34.2% of persons without a POLST Form died in a hospital

(Fromme, Erik, et.al., "Association Between Physician Orders for Life-Sustaining Treatment for Scope of Treatment and In-Hospital Death in Oregon", JAGS, Vol. 62, No. 7, July 2014, pp 1246–1251.)
